

Uniting for Wisconsin's Energy Future

MISSION: Advance policy solutions for Wisconsin's renewable natural gas industry while directly supporting individuals and organizations to grow the impact and use of biomass energy.

ADVOCATE AND INFORM

Advocate and inform policy-makers at all levels through various channels

- Issue-specific meetings with policy-makers
- Regular policy updates
- Site visits from legislators and agency leadership
- State Lobbying Day

EXPAND KNOWLEDGE

Keep up-to-date on the latest developments and education in the industry

- Member exclusive newsletter, *The Digest[er]*
- WBEC events and webinars
- Exclusive consulting support
- Membership calls

BUILD CONNECTIONS

Connect and collaborate across industries to advance and strengthen the biogas impact

- Present at events or webinars
- Promote your organization on the WBEC website
- Members featured on LinkedIn and Newsletters
- Use of the WBEC logo on marketing material

Annual Membership

Agricultural	Free
University or Public Sector or Municipal	\$500
Service Provider	\$2,500
Industry	\$4,500

INITIATIVES

WBEC took the lead role in assisting the Chair of the Assembly Committee on Agriculture – Gary Tauchen – in putting together the Wisconsin Agriculture - Carbon/Energy/Water (A-CEW) initiative. A-CEW is led by a public/private collaboration of WI legislative leaders and private sector executives and is exploring a series of options for consideration of legislative action in 2022 and beyond.

Develop

Standardize and reasonably priced pipeline interconnection specs and agreements per what is happening in other states

A certification and labeling program to allow farmers to access markets for sustainability and carbon

State sanctioned **Carbon Accounting system** for determining and verifying on farm Carbon Intensity in order to create a market for farms to sell their improvements into the Carbon Market

Research

Supply chain sustainability and if carbon requirements in the private marketplace are potentially of benefit to WI farmers

Funding sources based on the economic and environmental benefits for biodigester projects involving smaller dairy and other livestock farms

Verify

Farm renewable energy projects are properly compensated by utilities per Federal orders

Access to Intrastate pipelines for Renewable Natural Gas producers

WBEC is also seeking partnership and grant opportunities to fund research and development of policy ideas and protocols for carbon accounting.
